# Adam Walker

## Adam Walker

I am a computer consultant based in Bristol. I have direct experience in implementing all types of IT systems. From email servers to Accounting systems. From local networks to national 'Wide Area Networks'. From intranets to full blown eCommerce solutions... and much more... I have worked in Information Technology for nearly 15 years and have been involved in every area. If I can't do something myself I know someone who can.

## Experience

2006–Current

ConsultWalker

Redland, Bristol
